issues has increased many-fold since the days of the last great wave of concern following the oil crises of the 1970s. Steven Fawkes' *Energy Efficiency* is a comprehensive guide for managers and policy-makers to the fundamental questions underpinning energy-efficiency and our responses to it: ¢ what do we really mean by energy efficiency? ¢ what is the potential (in different dimensions)? ¢ why it is important? ¢ what management processes lead to optimisation of energy efficiency? ¢ what technologies are useful for improving energy efficiency? ¢ what policies can be used to promote energy efficiency? ¢ how can energy efficiency be financed? ¢ how can energy suppliers engage with energy efficiency? The result is the most comprehensive review to-date of the barriers and opportunities associated with improving energy efficiency. Clearly written and erudite, Steven Fawkes addresses every aspect of

energy efficiency, including the huge and vitally important untapped potential offered by effective energy management and the application of existing technology. He also identifies barriers, such as the rebound effect and how they can be mitigated and he provides a comprehensive review of innovative energy efficiency financing options. This book is a 'must read' for anyone with an interest in energy supply and demand reduction.

AutoCAD 2018 Instructor James Leach
2017-07-07 This book is your AutoCAD 2018 Instructor. The objective of this book is to provide you with extensive knowledge of AutoCAD, whether you are taking an instructor-led course or learning on your own. AutoCAD 2018 Instructor maintains the pedagogy and in-depth coverage that have always been the hallmark of the Leach texts. As the top-selling university textbook for almost a decade, the AutoCAD Instructor

continues to deliver broad coverage of AutoCAD in a structured, easy-to-comprehend manner. AutoCAD 2018 Instructor is command-oriented, just like AutoCAD. Chapters are structured around related commands, similar to the organization of AutoCAD's menu system. The sequence of chapters starts with fundamental drawing commands and skills and then progresses to more elaborate procedures and specialized applications. The writing style introduces small pieces of information explained in simple form, and then builds on that knowledge to deliver more complex drawing strategies, requiring a synthesis of earlier concepts. Over 2000 figures illustrate the commands, features, and ideas. AutoCAD 2018 Instructor is an ideal reference guide, unlike tutorial-oriented books where specific information is hard to relocate. Because these chapters focus on related commands, and

complete coverage for each command is given in one place, the commands, procedures, and applications are easy to reference. Tabbed pages help locate tables, lists, appendices, and the comprehensive index.

Rural Migration in the Near East and North Africa - Regional trends Food and Agriculture Organization of the United Nations 2019-06-25 The Near East and North Africa (NENA) has always been affected and in many ways shaped by the high levels of human mobility. However, rural migration - or migration to, from and between rural areas - is often overlooked, despite its important ramifications for food security, agriculture, rural development and regional disparities. In the next decade, persistent poverty, climatic threats and increasing competition for natural resources may fuel greater levels of migration across NENA countries. This report was designed to provide policy makers, practitioners and

Media Constrained by Context Kristina Irion 2018-10-20 This books draws a comparative balance of twenty years' international media assistance in the five countries of the Western Balkans. The central question was what happens to imported models when they are transposed onto the newly

evolving media systems of transitional societies. Albania, Bosnia-Herzegovina, Kosovo, Macedonia and Serbia undertook a range of media reforms to conform with accession requirements of the European Union and the standards of the Council of Europe, among others. The essays explore the nexus between the democratic transformation of the media and international media assistance. The cross-national analysis concludes that the effects of international assistance are highly constrained by the local context. From today's vantage point it becomes obvious, that scaling media assistance does not necessarily improve outcomes. The experiences in the region suggest that imported solutions have not been very cognitive in all aspects of local conditions but international strategies tent to be rather schematic and lacked strategic approaches to promote media policy

stability, credible media reform and implementation. The book offers valuable insights into the nature and effects of media assistance and the strategies deployed by international aid agencies, local political forces, media professionals, civil society organizations and other actors.

You Can't Do it Alone Jean Johnson 2012 "You Can't Do It Alone provides school leaders with a crisp summary of opinion research among teachers, parents, and the public conducted by Public Agenda, Education Sector and other respected analysts. Homelessness Prevention and Intervention in Social Work Heather Larkin 2019-06-26 This important text provides a comprehensive survey of

homelessness in America: its scope and causes, its diverse populations, and the array of responses at the individual, community, and systems levels. Expert contributors explore the links between trauma and homelessness, the cycle of homelessness and health/mental health problems, and barriers preventing people from accessing services. Case studies of effective programs and practices focus on science-based interventions, broad understanding of client needs, and close coordination between systems and agencies. Finally, specialized chapters discuss issues and experiences common to homeless youth and young adults, including housing instability on college campuses and empowerment-based strategies for engaging youth voice in programming . Included in the coverage: Homelessness and health disparities: a health equity lens Affordable housing and housing policy responses to homelessness

Trauma-informed care in homelessness service settings: challenges and opportunities
Incorporating youth voice into services for young people experiencing homelessness
Homelessness Prevention and Intervention in Social Work fills a critical gap in the social work curriculum as a main or a supplementary text. It also makes an accessible resource for clinicians and community practitioners seeking current knowledge on the topic, practical approaches to working with clients experiencing homelessness, and useful information for effective program and policy design.

Europe and Central Asia Regional Overview of Food Security and Nutrition 2018 FAO 2019-02-04 Europe and Central Asia encompasses great economic, social and environmental

diversity, its countries are facing various food security and nutrition challenges. While they have made significant progress in reducing the prevalence of undernourishment over the past two decades, new evidence shows a stagnation of this trend, particularly in Central Asia. The in-depth analysis provides new evidence for monitoring trends in food security and nutrition, and progress made against specific targets of the Sustainable Development Goal 2.

This edited book explores narratives, contemporary dynamics and historical legacies demonstrating the long-standing relations between the continents, suggesting that the entangled Euro-African relations in multiple fields should be intended as a permanent condition for any analyses. The authors provide various evidence of the fact that the two continents are deeply part of shared but uneven structures of global wealth and power. Within those structures, certain dynamics are constantly produced and reproduced, yet new opportunities to subvert existing relations have also emerged recently. Hence, instead of proposing conceptual premises holding Africa and Europe as separate regions that get in touch at specific moments in time, be it colonialism, the Cold War, globalization, migration, this book critically considers that each of the matters explored is anything but an episode in a more complex,

intertwined story that ultimately represents the explanatory framework for present Euro-African relations. *Comdex Multimedia And Web Design Course Kit* Vikas Gupta 2006-11-14 The book is intended to aspiring students who wish to build their career in the field of graphics and animation. INTRODUCTION TO INFORMATION

TECHNOLOGY RAJARAMAN, V. 2018-01-01 his textbook is designed to teach a first course in Information

Technology (IT) to all undergraduate

students. In view of the all-pervasive nature of IT in today's world a decision has been taken by many universities to introduce IT as a compulsory core course to all Bachelor's degree students regardless of their specialisation. This book is intended for such a course. The approach taken in this book is to emphasize the fundamental "Science" of Information Technology rather than a cook book of skills. Skills can be learnt easily by practice with a computer and by using instructions given in simple web lessons that have been cited in the References. The book defines Information Technology as the technology that is used to acquire, store, organize, process and disseminate processed data, namely, information. The unique aspect of the book is to examine processing all types of data: numbers, text, images, audio and video data. As IT is a rapidly changing field, we have taken the approach to emphasize reasonably

stable, fundamental concepts on which the technology is built. A unique feature of the book is the discussion of topics such as image, audio and video compression technologies from first principles. We have also described the latest technologies such as 'e-wallets' and 'cloud computing'. The book is suitable for all Bachelor's degree students in Science, Arts, Computer Applications, and Commerce. It is also useful for general reading to learn about IT and its latest trends. Those who are curious to know, the principles used to design jpg, mp3 and mpeg4 compression, the image formats—bmp, tiff, gif, png, and jpg, search engines, payment systems such as BHIM and Paytm, and cloud computing, to mention a few of the technologies discussed, will find this book useful. Maps and the Internet M.P. Peterson
2005-12-31 This book examines a new trend affecting cartography and geographic information science. Presenting the work of over 30 authors from 16 different countries, the book provides an overview of current research in the new area of Internet Cartography. Chapters deal with the growth of this form of map distribution, uses in education, privacy issues, and technical aspects from the point of view of the map provider - including Internet protocols such as XML and SVG. Many see the Internet as a revolution for cartography. Previously tied to the medium of paper and expensive large-format color print technology, maps had a limited distribution and use. The Internet made it possible to not only distribute maps to a much larger audience but also to incorporate interaction and animation in the

display. Maps have also become timelier with some maps of traffic and weather being updated every few minutes. In addition, it is now possible to access maps from servers throughout the world. Finally, the Internet has made historic maps available for viewing to the public that were previously only available in map libraries with limited access. * Provides comprehensive coverage of maps and the internet * Delivers a global perspective * Combines theoretical and practical aspects

Up in the Air? Tarik Jusić 2021-06-01

The agenda for transition after the demise of communism in the Western Balkans made the conversion of state radio and television into public service broadcasters a priority, converting mouthpieces of the regime into public forums in which various interests and standpoints could be shared and deliberated. There is general agreement that this endeavor has not been a success. Formally, the countries adopted the legal and institutional requirements of public service media according to European standards. The ruling political elites, however, retained their control over the public media by various means. Can this trend be reversed? Instead of being

marginalized or totally manipulated, can public service media become vehicles of genuine democratization? A comparison of public service media in seven countries (Albania, Bosnia & Herzegovina, Croatia, Kosovo, Montenegro, North Macedonia, and Serbia) addresses these important questions.

The Europeanisation of the Western Balkans Jelena Džankić 2018-09-21 This volume casts a fresh look on how the political spaces of the Western Balkan states (Croatia, Bosnia and Herzegovina, Serbia, Montenegro, Kosovo, Macedonia and Albania) are shaped, governed and transformed during the EU accession process. The contributors argue that EU conditionality in the Western Balkans does not work 'effectively' in terms of social change because rule transfer remains a 'contested' business, due to veto-players on the ground and strong legacies of the past. The volume examines specific

policy areas, salient in the enlargement process and to a different degree incorporated in the accession criteria, as well as EU foreign policy in the spheres of post-conflict stabilisation, democratization and the rule of law promotion.

Conservation of Shared Environments

Laura López-Hoffman 2009 The United States and Mexico's shared environment extends far beyond the political line. For instance, it comprises the plant and animal species whose natural distributions extend deep into each nation along with the waters in rivers and aquifers that support ecosystem function far removed from the border. Conservation of Shared Environments presents a broad perspective on the ecological, social and political challenges of conserving biodiversity across the U.S.-Mexico border. Covering topics as diverse as wildlife and grassland preservation,

Tradition and Modernity. Changing the Images of Women in Selected Fiction by Manju Kapur and Anita Nair

Sasikala Alagiri 2017-12 Along with a range of socio-cultural, political and economic concerns, the focus on 'self' has been an inevitable assertion of writers during the last quarter of the twentieth century. Individualistic in tone, the contemporary women novelists are trying to portray realistically the predicament of modern women torn between the forces of tradition and modernity, their sense of frustration and alienation, the emotional and psychological turmoil and complexities of man-women relationships and subtleties of feminine consciousness against the persistent patriarchal social set-up. Cognizant of the evils originating

from patriarchy, a positive sense of feminine identity has been recognized by them and the result is the emergence of a new woman in Indian society and its concept in the Indian English novel which has assumed a strident posture in the contemporary writings by women. The shift from submission to assertion, acquiescence to resistance and obedience to rebellion, however, has not been abrupt and effortless. Women are still in the process of negotiation with different limiting factors and thresholds of patriarchy to claim their due space and affirm their identity. The present study is an attempt to critically investigate the negotiations with cultural norms by the women characters in the selected novels by the contemporary novelists, namely Manju Kapur and Anita Nair. Almost all the women characters, major and minor, from the selected novels have been considered and positioned as per their ideological

leanings and convictions under two thematic chapters namely “Women in the Clutches of Traditional Norms,” and “Tradition to Modernity.” The major issues around which the novels move - education, marriage, gendered space and mother-daughter relationships - are taken up to put them within the contemporary social conditions in which women characters live. The present book is divided into five chapters to make a critical and analytical study of the select novels of these contemporary Indian women writers in English. The present work is focused on five selected novels: Manju Kapur’s “Difficult Daughters”, “Home” and “Custody” and Anita Nair’s “Ladies Coupé” and “Mistress”.

Data Privacy Management and Autonomous Spontaneous Security

Joaquin Garcia-Alfaro 2014-03-20 This book constitutes the revised selected papers of the 8th International Workshop on Data Privacy Management,

DPM 2013, and the 6th International Workshop on Autonomous and Spontaneous Security, SETOP 2013, held in Egham, UK, in September 2013 and co-located with the 18th European Symposium on Research in Computer Security (ESORICS 2013). The volume contains 13 full papers selected out of 46 submissions and 1 keynote lecturer from the DPM workshop and 6 full papers together with 5 short papers selected among numerous submissions to the SETOP workshop. The papers cover topics related to the management of privacy-sensitive information and automated configuration of security, focusing in particular on system-level privacy policies, administration of sensitive identifiers, data integration and privacy, engineering authentication and authorization, mobile security and vulnerabilities.

Insights on Marriage and Cohabitation
Macarena Sáez 2015-05-06 This book shows six different realities of same-sex families. They range from full recognition of same-sex marriage to full invisibility of gay and lesbian individuals and their families. The broad spectrum of experiences presented in this book share some commonalities: in all of them legal scholars and civil society are moving legal boundaries or thinking of spaces within rigid legal systems for same-sex families to function. In all of them there have been legal claims to recognize the existence of same-sex families. The difference between them lies in the response of courts. Regardless of the type of legal system, when courts have viewed claims of same-sex couples and their families as problems of individual rights, they have responded with a constitutional narrative protecting same-sex couples and their families. When courts

respond to these claims with rigid concepts of what a family is and what marriage is as if legal concepts where unmodifiable, same-sex couples have remained outside the protection of the law. Until forty years ago marriage was the only union considered legitimate to form a family. Today more than 30 countries have granted rights to same sex couples, including several that have opened up marriage to couples of the same sex. Every day there is a new bill being discussed or a new claim being brought to courts seeking formal recognition of same sex couples. Not all countries are open to changing their legal structures to accommodate same-sex couples, but even those with no visible changes are witnessing new voices in their communities challenging the status quo and envisioning more flexible legal systems.

Practical Development Environments

Matthew B. Doar 2005-09-23 This book doesn't tell you how to write faster code, or how to write code with fewer memory leaks, or even how to debug code at all. What it does tell you is how to build your product in better ways, how to keep track of the code that you write, and how to track the bugs in your code. Plus some more things you'll wish you had known before starting a project. Practical Development Environments is a guide, a collection of advice about real development environments for small to medium-sized projects and groups. Each of the chapters considers a different kind of tool - tools for tracking versions of files, build tools, testing tools, bug-tracking tools, tools for creating documentation, and tools for creating packaged releases. Each chapter discusses what you should look for in that kind of tool and what to avoid.

and also describes some good ideas, bad ideas, and annoying experiences for each area. Specific instances of each type of tool are described in enough detail so that you can decide which ones you want to investigate further. Developers want to write code, not maintain makefiles. Writers want to write content instead of manage templates. IT provides machines, but doesn't have time to maintain all the different tools. Managers want the product to move smoothly from development to release, and are interested in tools to help this happen more often. Whether as a full-time position or just because they are helpful, all projects have toolsmiths: making choices about tools, installing them, and then maintaining the tools that everyone else depends upon. This book is especially for everyone who ends up being a toolsmith for his or her group.

Advances in Digital Forensics IX

Gilbert Peterson 2013-10-09 Digital forensics deals with the acquisition, preservation, examination, analysis and presentation of electronic evidence. Networked computing, wireless communications and portable electronic devices have expanded the role of digital forensics beyond traditional computer crime investigations. Practically every crime now involves some aspect of digital evidence; digital forensics provides the techniques and tools to articulate this evidence. Digital forensics also has myriad intelligence applications. Furthermore, it has a vital role in information assurance - investigations of security breaches yield valuable information that can be used to design more secure systems. Advances in Digital Forensics IX describe original research results and innovative applications in the discipline of digital forensics. In addition,

highlights some of the major technical and legal issues related to digital evidence and electronic crime investigations. The areas of coverage include: Themes and Issues, Forensic Models, Forensic Techniques, File system Forensics, Network Forensics, Cloud Forensics, Forensic Tools, and Advanced Forensic Techniques. This book is the ninth volume in the annual series produced by the International Federation for Information Processing (IFIP) Working Group 11.9 on Digital Forensics, an international community of scientists, engineers and practitioners dedicated to advancing the state of the art of research and practice in digital forensics. The book contains a selection of twenty-five edited papers from the Ninth Annual IFIP WG 11.9 International Conference on Digital Forensics, held in Orlando, Florida, USA in the winter of 2013. Advances in Digital Forensics IX is an important resource

for researchers, faculty members and graduate students, as well as for practitioners and individuals engaged in research and development efforts for the law enforcement and intelligence communities. Regional Overview of Food Security and Nutrition in Europe and Central Asia 2018

Food and Agriculture Organization of the United Nations
2019-04-02 The Regional Overview of Food Security and Nutrition in Europe and Central Asia 2018 provides new evidence for monitoring trends in food security and nutrition within the framework of the 2030 Sustainable Development Agenda. The in-depth analysis of progress made against Sustainable Development Goal 2 Target 2.1 (to end hunger and ensure access to food by all) and Target 2.2 (to end all forms of malnutrition), as well as the state of micronutrient deficiencies, is complemented by a review of recent policy measures taken to address food security and nutrition in all its dimensions. The Europe and Central Asia (ECA) region

encompasses great economic, social and environmental diversity, and its countries are facing various food security and nutrition challenges. While they have made significant progress in reducing the prevalence of undernourishment over the past two decades, new evidence shows a stagnation of this trend, particularly in Central Asia. Malnutrition in one or more of its three main forms - undernutrition, micronutrient deficiencies, and overweight and obesity - is present to varying degrees in all countries of the region. Often, all three forms coexist, creating what is called the "triple burden of malnutrition." Overweight among children and obesity among adults continue to rise - with now almost one-fourth of the region's adults obese - and constitute a significant concern for future health and well-being and related costs. While poverty levels in most ECA countries have been declining in

recent years, poverty coupled with inequality has led to increased vulnerability of disadvantaged groups and populations in rural and remote areas of low- and lower-middle-income countries. New analysis shows that adult women have a higher prevalence of severe food insecurity than men in some areas, pointing to gender inequalities that are reflected in access to food. Addressing gender and other inequalities is key to achieving the Sustainable Development Goals and heeding the call to "leave no one behind." The publication's focus this year is on migration, gender and youth and the linkages with rural development and food security in Europe and Central Asia. Migration is linked in multiple ways to gender, youth, and agricultural and rural development - both as a driver and possible source of development opportunities, with labour migration and remittances playing significant roles in the

region. Changing migration processes need to be fully understood to better address the challenges of migration and harness the potential benefits for sustainable development and revitalized rural areas. Governments, public and private institutions, communities and other concerned parties must strengthen collaboration and scale up efforts towards achieving the goals of a thriving, healthy and food-secure region.
